

PHYSIOTHERAPY

Master of Science

Vincent Pol University in Lublin

The main goal of our MSc Physiotherapy programme is to enable graduates of bachelor's degree in Physiotherapy to continue their studies and develop their knowledge and skills.

Our 2-year MSc Physiotherapy programme develops the ability to use high-level clinical reasoning skills to assess, diagnose and treat people with movement

problems caused by a wide variety of joint, muscle, nerve and metabolic disorders. Students will gain in-depth knowledge and advanced skills, necessary to critically evaluate and contribute to research in preferred area of clinical specialty. Students also gain the abilities of planning and controlling the effectiveness of a medical rehabilitation process. Acquiring these abilities is possible thanks to an extensive schedule of theoretical and practical classes within special methods used in physiotherapy, neurodevelopmental techniques (PNF, NDT-Bobath), physical medicine and functional diagnosis and rehabilitation programming. Graduates are prepared for work in scientific research institutions, state administrative and municipal centres and are eligible to apply for a professional specialty in physiotherapy as well as PhD studies.

PLACEMENT

The MSc programme includes clinical placements, integrated throughout the course. It enables students to gain invaluable experience and enhance their learning. Students complete a minimum of 600 hours of clinical training. There is an opportunity to do practical training under the supervision of highly-qualified physiotherapists in a range of clinical facilities.

CAREERS

The graduates of Physiotherapy MSc have sufficient qualifications for working independently with ill and disabled patients. They are prepared for developing their career in scientific research institutions, and state administrative and municipal centres. The extensive variety of career opportunities makes physiotherapy an interesting profession, allowing students to develop not only professional, but also interpersonal skills.
